EVERYTHING YOU NEED IN ONE DEVICE....

The world's only multi-application RF platform with real-time temperature monitoring, controlled cooling, impedance intelligence & square spectrum energy profiling for truly customizable procedures without costly consumables.

TO TREAT FROM THE HEAD TO TOE....

BACKED BY SCIENCE....

Independent studies have demonstrated that exposure to BTL EXILIS ELITE™'s high energy radiofrequency can cause skin tightening¹ and apoptosis of fat cells² that leads to circumferential reduction.²

AND RECOMMENDED BY YOUR COLLEAGUES....

"Exilis has quickly become our most popular office procedure! Many of my patients have an area on their face, neck or body that can benefit from the tightening and contouring of this radio frequency device. It is painless, with no downtime and my patients love the results."

Rhonda Rand, MD

"We are very happy that Exilis Elite can provide consistent results for the face and neck in just three treatments. We also own another well known device and have found that the results with the Exilis Elite are just as consistent, with no downtime, minimal discomfort and no disposable costs."

Leif Rogers, MD

"Not only do my patients love the results but they love the lack of pain associated with other modalities. My practice has benefited financially because it is not paying for costly disposables, tips or hand pieces required for usage."

Grace Liu, MD
