360° VOLUMETRIC HEATING.

- 360° Volumetric Heating for faster, safer and more comfortable treatment of women's intimate parts.
- Groundbreaking EFC™ (Energy Flow Control) system with integrated impedance intelligence ensures uniform heating of targeted tissue.
- Various Plug & Play tips with the largest spot size on the market.

PROVEN BY YOUR COLLEAGUES...

"The BTL Ultra Femme is a quick, easy to perform, non-invasive procedure with no downtime that is a safe and effective treatment to help with feminine issues. The demand for these procedures has been overwhelming and women are very grateful to have options to help them with female intimate health issues for which there have been few options."

M. C. Lee, M.D.

"The BTL Ultra Femme 360 is an incredibly exciting solution to all of those issues in women's health. I personally have now treated dozens of women for various conditions with tremendous results. Thanks to all the great research by the BTL team, we now have a radiofrequency treatment which is very effective."

S. C. Lajli M.D.

"More women in my practice that are struggling with their intimate parts have signed up for the Ultra Femme procedure. Their feedback to date has been great. Namely no pain and results they can feel!"

K. L. Evans, M.D.
